3D Immersive Product Strategy Showcase

CORE EXPERTISE

Pi-Shaped: UX Design + Tech Validation

Validation: JS/ES6+, WebGL, Python

Execution: Jira, Figma, SQL, n8n

Logic: Gherkin AC, RICE, MoSCoW

EDUCATION

Bachelor in Finance & Banking

FPT University (2010 – 2014)

Pi-shaped Technical Product Specialist with 10+ years of experience executing roadmaps across **Fintech, DePIN (IoT & Web3), and EV mobility**. I serve as a Technical Product Partner, bridging the gap between abstract business strategy and deep engineering reality. By integrating **UX Design with functional prototyping**, I validate complex product logic ensuring requirements are architecturally sound and user-optimized.

EXPERIENCE

Arkreen Network

May 2025 – Present

Technical Product Consultant (Independent)

> *A decentralized energy network (DePIN) leveraging Digital Twin technology for green energy assets.*

- **Strategic Prototyping**: Co-developed high-fidelity interactive 3D dashboards (WebGL) to visualize real-time IoT data, utilized for **investor pitching** and stakeholder buy-in.
- **Technical De-risking**: Validated requirement scalability using GLSL/Shaders to ensure architectural feasibility for complex 3D environments.
- **Productivity Automation**: Deployed automated product management workflows using **n8n and AI**, reducing manual project overhead by an estimated **40%**.

VinFast - Vingroup

Oct 2021 – May 2025

Senior ITBA / Product Owner (IoT & Smart Systems)

> *Vietnam's global EV manufacturer building an integrated digital mobility ecosystem.*

- **Digital Transformation (VCA & Reliability Audit)**: Digitized manual quality control workflows for Vehicle Customer Audit and Reliability, improving **Mean Time to Detect (MTTD) by 25%** through real-time telemetry and automated alerting.
- **Factory QA Requirements (SSOT)**: Established a **Single Source of Truth (SSOT)**, aligning **10,000+ employees** for

GPA: 3.6/4.0 | Full Merit Scholarship

cloud-based tracking and interoperability.

- **Factory Executive Reporting & Training (FERT)**: Digitized skills certification and onboarding processes for **10,000+ personnel**, achieving **10,000+ certified workers** and **100% paperwork reduction** while providing real-time readiness dashboards to factory leadership.
- **B2B Energy Management System (EMS)**: Served as Product Owner for the complete B2B IoT telemetry platform for energy hardware. Designed the admin portal's UX to translate highly complex grid, battery, and inverter diagnostics into intuitive visual flows for remote monitoring.
- **Loyalty & Rewards System**: Contributed as a key team member and Business Analyst, helping unify disjointed customer data into an interoperable omnichannel user experience.

Gapo Social Network

Oct 2019 – Apr 2021

Senior IT Business Analyst

> *A Vietnamese social platform focusing on community engagement and core social features.*

- **Data-Driven Retention**: Utilized **RICE scoring** to prioritize technically feasible fixes for user drop-off issues identified via Firebase, resulting in measurable retention improvements.
- **Quality Assurance**: Led the UAT process personally, reducing post-launch bugs through **Gherkin-style** detailed Acceptance Criteria (AC).
- Mentored junior BA team members on requirement engineering and prioritization standards.

Five9 Vietnam

May 2018 – Oct 2019

BA Team Lead / Product Owner

> *Fintech startup building the "Mony" P2P lending platform for SE Asia market.*

- **Product Ownership**: Managed the "Mony" P2P platform from concept to launch; used **MoSCoW** to define MVP scope and manage stakeholder change requests.
- Designed real-time dashboards for operational risk assessment and faster decision cycles.

- Led technical integrations with VNPay and Bao Kim payment gateways.

Centech Interactive

Nov 2016 – Apr 2018

IT Business Analyst

> *A technology agency specializing in mobile VAS and digital content services.*

- Managed project backlogs and prioritized deliverables using **MoSCoW** to meet aggressive agency timelines.
- Elicited and documented business requirements for various Mobile VAS and Digital Content projects.

ECPay (EVN)

Jun 2015 – Oct 2016

IT Business Analyst

> *Electricity payment gateway under Vietnam Electricity (EVN).*

- Supported the development of the e-wallet system; applied **MoSCoW** to manage feature rollouts for power consumers.
- Analyzed transaction data to improve system performance and user experience.

Bao Kim (VNP Group)

Aug 2014 – May 2015

Business Analyst

> *One of Vietnam's pioneering e-payment gateways.*

- Collaborated with the Dev team for early-stage fintech product releases using structured prioritization techniques.
- Conducted market research and gathered user requirements for new payment features and partner integrations.
